

## Experience Banking: Banking Transformed

Today, financial institutions around the world are taking advantage of the Microsoft platform to transform the customer experience, the employee experience, and the operations experience. By offering integrated products and technologies, Microsoft and its partners offer a platform to connect existing systems and achieve the best economic value for their technology investments.

"We believe technology plays an important role in transforming the banking experience," says Lewis. "Together with our partner community, we have developed industry-specific offerings to meet the business needs of the banking industry across the globe. These solutions help banks realize a powerful blend of cost-effective, rapidly implemented solutions today that lay the groundwork for future integrated innovation — something financial institutions have long sought."
